

## Roche Personalhaus Building 67, Basel

The staff amenities building, originally designed by Roland Rohn, was a "gift" from Roche's owners to their employees. It is a significant building with regards to use and operations but also concerning its architecture. After intensive studies, the Roche Management decided that the building should undergo a total renovation, launching a new generation of use and operations while maintaining and strengthening the building's outstanding architecture. There is an emphasis on hospitality, with a canteen, a restaurant, a café and a catering service. The building also includes guest areas, a swimming pool, a kiosk, technical rooms, a large underground garage and the central receiving dock.
