

## Roche Buildings 254-257, Basel

To create a common location for all 1550 IT employees, four 5-storey buildings were realised on the Kaiseraugst site. The buildings provide the spatial and infrastructural conditions for an ideal working environment. The collaboration and communication between the employees were central to the planning. The core communications area, which runs vertically through the building, forms the centrepiece. It is complemented by 100 large and small meeting rooms, as well as additional quiet rooms, several cafés and further amenities.

### Client

F. Hoffmann-La Roche AG
